## GREEN-POTTED GROWING VINES DELIVERED POTTED

Green-potted growing vines ("Greens") have been grafted, greenhouse grown and climatized for approximately 14-16 weeks. They are delivered either green growing or dormant.

- Can be ordered and delivered within the same calendar year.
- An excellent option when field-grown vines are unavailable
- Recommended for new plantings with drip irrigation
- Potted using biodegradable planting plugs with slow release fertilizer
- Available in Standard (12") and Tall (24") lengths
- Minimum ordering quantity for custom order is 500 grape vines

*\*Optimum planting window is May - July, depending on location*

*\*We encourage the use of vine shelters (grow tubes).*

*\*Dormant potted vines delivered September - December, when lignified, or held in cold storage until the following Spring.*
