January 6, 2025

Kevin,

Another full season of inspections and virus testing has concluded for the 2024 calendar year. As of today, WSDA has found no visual symptoms and no positive test results for red blotch virus in any of Inland Desert Nursery's registered grapevine mother blocks, or in any of the other WSDA registered grapevine blocks. Here is updated testing data from the last five seasons for all of WSDA's Registered Grapevine Nurseries.

Season	Source	Composite vine samples	GRBV Positive	Single vine samples	GRBV Positive	Total vines tested
2020	WSDA Registered nurseries	2373	0	2113	0	17066
2021	WSDA Registered nurseries	4411	0	3089	0	29900
2022	WSDA Registered nurseries	4784	0	1953	0	29353
2023	WSDA Registered nurseries	4878	0	493	0	27350
2024	WSDA Registered nurseries	4162	0	2346	0	22522

WSDA will continue to include red blotch virus in our regular Spring and Fall inspections, as well as virus testing.

Please let me know if you have any questions or concerns.

Have a good day,

Aaron Paul
